

Health & Genetic Warranty

The Seller(s) certify that the puppy you purchase is in sound health at the time of sale to the best of our knowledge and has been given all vaccinations and wormings stated on the vaccination record provided to the Buyer(s). We do our best to provide the new owner with a healthy puppy. The buyer will be responsible for further vaccinations and boosters.

The following stipulations must be adhered to in order for replacement to be made. Official reports from 2 unaffiliated veterinarians stating that, without a doubt, the puppy has a genetic defect that will cause a shortened life to the puppy, must be sent along with phone numbers of each vet. If the puppy should die, an autopsy MUST BE DONE by a licensed veterinarian stating the cause of death. The documentation must be forwarded to us before a determination will be made.

The Seller(s) reserve the right to confirm the diagnosis with a veterinarian of their choice. The seller will not be responsible for any expenses you may incur, including shipping and vet expenses. This warranty applies only to the original buyer. Puppy replacement or credit for future puppy only.

We cannot control the exposure your puppy encounters after leaving here. Puppies sometimes stress when adopted and moved to their new home. This stress can be brought in due to the move, change of diet, too much handling, not enough quiet time, or not eating properly. This stress can also bring on things that are dormant such as but not limited to worms, ear mites, colds, hypoglycemia, and/or coccidiosis, and/or giardiasis. These conditions are all treatable and do not warrant a replacement. There is no guarantee on the color or size of your puppy now or as an adult.

The following are NOT covered by this guarantee:

- Reimbursement for veterinary expenses
- External parasites such as ticks, fleas, or ear mites
- Internal parasites such as intestinal worms or their effects, (almost) every puppy has some sort of intestinal worms; although we have wormed your puppy regularly, it only takes a few days for him/her to pick up another "batch". That's just a part of puppyhood, which is why a regular worming schedule is recommended.

We strongly recommend but do not require that your puppy be spayed or neutered. It is your ultimate responsibility to take care of your puppy and provide adequate food, water, shelter, veterinarian care.

Please be aware that as a new puppy owner you share the responsibility to help prevent hip dysplasia, as it has been proved to be part heredity and increasingly environmental. We have bred this puppy based on sound stock through proper diet, proper exercise, and quality living conditions. You can pay an important role in helping your puppy grow into a healthy adult.

I, the Seller, do hereby agree to offer a two (2) week health and a one (1) year genetic warranty on this puppy.
